

# US 12 / SR 124 Interchange Footprint Study

***WSDOT is conducting this interchange study at the intersection of US 12 and SR 124 in the Burbank vicinity.***

***This study is not part of the US 12 Phase 2 construction project, nor has the interchange been allocated any design or construction funding.***

**What is the goal of this study?**

- To determine the most desirable interchange location and configuration while taking the concerns and ideas of interested citizens into consideration

**Why is this study being conducted?**

- Between Burbank and Walla Walla, long-range plans for US 12 include eliminating all at-grade intersections and constructing interchanges at strategic locations throughout the corridor
- To ensure that the design on Phase 2 will accommodate the future interchange
- To allow for property development that will not interfere with the future interchange

**Why study an interchange at the US 12/SR 124 intersection and not at Humorist Road?**

- Locating an interchange at Humorist Road would route commercial traffic near schools and residential neighborhoods
- Locating an interchange at Humorist Road would require realignment of SR 124 and significantly impact the McNary Wildlife Refuge
